

## Increased Use of Afghan Nationals for Terrorism in Pakistan

Misguided TTP leadership is living a comfortable life in Afghanistan, but under pretext of its so-called Jihad, it is inciting Afghan citizens for terrorism, especially suicide attacks in Pakistan.

**Afghan terrorists are frustrated due to severe difficulties in Pakistan, which are due to following factors:**

- **Afghan terrorists are unfamiliar with local areas, routes and are dependant on TTP for movement, while local facilitation is lacking.**
- **TTP is sending Afghan terrorists to most difficult areas and letting them be killed at the hands of Pakistani security agencies, while cowardly terrorists of TTP are suffering from fear and are restricted to their hideouts.**
- **Locals are voluntarily revealing information about terrorists presence and movement. Resultantly killings of terrorists are at rise.**
- **During last three months, 45 Afghan terrorists have been killed by Pakistani security agencies, while many others have been arrested.**

In such circumstances, it is responsibility of Afghan Interim Government to prevent its nationals from being used by TTP as fuel for so-called Jihad and to uproot TTP training centers from its territory.
