Statement of National Security Committee Against Terrorism TTP Leadership in Stress

Recent meeting of National Security Committee and news of comprehensive operation have inculcated intense fear among TTP ranks, thus compelling them to resort to fake statements. However, real facts are as under:-

- After merger of tribal districts, rehabilitation of these areas is a very important for the state. State machinery is making efforts to achieve the same, while development and prosperity is very important in these areas utilizing all resources, however TTP is a major obstacle for that.
- By spreading fake news regarding large-scale operation and possible displacement in tribal districts, anti-state elements are trying to incite public against the state through mutual nexus and unsuccessfully trying to create conflict between state institutions leading to public frustration.
- In the backdrop of current political situation, TTP is trying to present itself as a political party through such statements, while in reality it opposes democracy.
- State holds the authority, either to accept a group or not. Now its up to Khawarij to surrender, accept Pakistani Constitution and ask themselves about who took the initiative to end the ceasefire.
- Terrorists are spreading anti-operation narrative, because they want to return to Pakistan through negotiations instead of operation.

With such statements, TTP is trying to make the situation favorable for them, while trying to create atmosphere of mistrust between public and security agencies. Pakistani people are well aware of TTP and express extreme hate against them.
