Karachi Attack - Terrible Outcome for Terrorists

TTP is facing continuous humiliation at the hands of security agencies in different areas of Khyber Pakhtunkhwa. More than 90 TTP terrorists have been killed and 40 more have been arrested in various operations during last one and half month.

Main reason for recent TTP failures is refusal of Pashtun locals in terror facilitation and support of security agencies against them. In such circumstances, it has become difficult for terrorists to hide in these areas thus being killed at the hands of security agencies on daily basis.

Failed terrorist attack in Karachi is mainly to divert attention from growing internal rifts and appease external masters.

After these cowardly attacks, public reaction has intensified and determination of security agencies has become stronger.
