## Public Reaction on Social Media TTP Suffers from Severe Depression

TTP failed attempt to spread false propaganda on social media through foreign facilitation, while recent severe public backlash on social media has left TTP leadership confused.

**TTP instructing terrorists to stay away from social media and get information from false Umar media source is evidence of TTP's failed attempt to keep its misguided followers away from truth and public reaction.**

Alhamdulillah, defeated on every front, TTP Khawarij are unable to face public reaction even on social media and are forced to make false statements.
