TTP's Use of Afghan Soil and Nationals for Terrorist Attacks

Following recent casualties, growing public hatred and lack of locals facilitation, TTP is using Afghan soil and its poor and vulnerable citizens for money to launch terrorist attacks in Pakistan.

Under the influence of foreign intelligence agencies, TTP is training suicide bombers in so called madaris and hideouts along with logistic network for transportation of equipment to be used in terrorism.

There are irrefutable evidences of use of Afghan citizens, especially Afghan refugees and young children in anti Pakistan attacks by TTP. Most of terrorists killed and arrested during recent operations of security agencies are Afghan citizens.

Afghan Interim Government has realized the fact that TTP is causing a strain in brotherly relations between two neighboring countries and it is hoped that TTP hideouts will be eliminated from border areas soon.
