

Public Narrative Against Terrorism on Social Media - TTP Left Cluttered

"فَنَجْعَلُ لَعْنَةَ اللَّهِ عَلَى الْكَاذِبِينَ" (Surah Al-Imran: 61)

Translation: "May Allah curse those who are liars".

Pakistan's public hatred against terrorism is ever increasing. This growing hatred is being expressed by all schools of thought, especially Pashtun public and religious scholars. Social media platforms are being used for this purpose. TTP's leadership is deeply concerned and its terrorists are suffering from despair and mental anguish due to expression of public hatred.

TTP has been using social media for negative propaganda with the help of hostile agencies, with an aim to cover up their failures, depict cohesion of terrorist organization for new recruitment, appease financiers and divert attention from internal rifts.

In a recent statement by TTP's so-called Information Minister, Terrorist Commander Ghufuran, terrorist groups have been requested to support various propaganda platforms of Umar Media, with an aim to conceal increasing disagreements among TTP groups, evident from contradictory statements on social media. A recent example of this fact is conflicting statements of TTP Umar Media and Jamaat-ul-Ahrar affiliated Ghazi Media after suicide attack on the Peshawar Police Line Mosque.

Pakistan's public after having rejected TTP's propagandas, are supporting truth. On one hand, Pakistani security agencies are bringing end to terrorists while on the other hand, Pakistan's public are giving clear message to terrorists and their facilitators by expressing their hatred against TTP on social media that this war will be won by rightful, Insha Allah.
