Big Success of Khyber Pakhtunkhwa Police and CTD Against Daesh (ISKP)

Police and CTD identified Daesh (ISKP) network on the basis of intelligence in Peshawar and surroundings, killed one terrorist and arrested 14 others.

Daesh-affiliated terrorists were involved in target killings of minorities (Sikhs and Christians) and religious leaders and were planning terrorist activities during Muharram.

Artificial intelligence based command and control system, recently installed in Peshawar has played vital role in identification and arrest of ISKP terrorists.

Khyber Pakhtunkhwa Police and CTD, along with other security agencies are playing important role in eradicating terrorism, while Daesh or any terrorist organization will not be given a chance to flourish.
