TTP's Fake Statement Regarding Ongoing Tension in Parachinar and Public Reaction

The ongoing tension between Shia and Sunni tribes in Parachinar is due to land dispute and can only be resolved through jirga. Civil administration is trying to find permanent solution, for which land commission has been formed for the first time, while scholars from both sides are also playing their role.

In the past, both parties have been resolving mutual disputes with understanding and current dispute will also be resolved through dialogue and regional traditions.

Opportunistic TTP is trying to take advantage of this controversy to give a false impression that may be both sects will stand against security agencies, which has never happened and is not likely to happen now, because people of Kurram are patriotic and know their problems.

People of Kurram send message to TTP that they do not need to indulge in this dispute and in case of any attempt to spread chaos, TTP will bear all the blame.

People of Kurram reject TTP as a nation beyond sectarianism and will never allow its efforts to succeed in spreading chaos.
