South Waziristan: Local Tribes Expressing Gratitude on Killing of Terrorists

Recently, security forces successful operation in uninhabited and difficult mountainous areas adjacent to Sararogha area of South Waziristan has stunned TTP with death of 40 terrorists and terrorist leadership is suffering from severe panic. Pakistan's public is asking TTP about their silence and not acknowledging these killings.

On the other hand, after these killings, terrorists requested local elders for burial of slain terrorists, but local tribes have buried them on spot with support of security agencies.

After operation, local tribes have expressed unrelatedness towards slain terrorists and expressed satisfaction over their death, as terrorists had made life difficult for locals and have been coercing them to provide food and other items.

While this operation has dealt a severe blow to TTP organization, false propaganda about security forces on social media to support rehabilitation of terrorists has also been badly exposed.
